

Sustainable Energy Consultant Required

London-based (Lausanne possible)

About us

E4tech is a successful sustainable energy consultancy concentrating on the overlap between energy technology, environmental needs and business opportunities. We work for a wide range of prestigious international clients in the industrial, financial and government sectors through our offices in London and Lausanne. The vital ingredients of our work are a strategic approach to our clients' challenges, combined with a sound understanding of their areas of interest. Further information is available via www.e4tech.com

The role

Continued growth in our core areas of bioenergy, hydrogen and fuel cells, novel energy technologies, sustainable buildings, energy systems and related life cycle assessments means that we plan to expand our London team. The new consultant will participate in a wide variety of project work and also in the development of a dynamic firm.

About you

Suitable candidates will have academic and/or work experience in at least one of the core areas listed above, combined with enthusiasm and initiative. Work experience in a consulting or commercial environment is required, together with a very good degree (preferably postgraduate) in a relevant subject.

Fluent English is essential and other languages would be a strong advantage. The opportunity to join our Lausanne office will be considered for suitable candidates who are flexible to work in Switzerland. Salary will be based upon experience.

To apply, please email your CV and a short note explaining why you would like to join E4tech to jobs@e4tech.com. The closing date for applications is **6th July 2008**.
