

Sustainability Consultants required

London-based

About us

E4tech is a strategic consultancy focused on sustainable energy, chemicals and materials. We work with companies, governments and investors wanting to understand the global opportunities and challenges of clean energy, chemicals and materials. We have a strong track record in providing strategic business and policy advice backed up by sound technical knowledge.

E4tech's clients call on us for strategy development and business planning, market and competitor analysis, due diligence support, and policy analysis and development. We also conduct detailed modelling and assessment work: techno-economic analyses of energy systems; life cycle, greenhouse gas and sustainability assessments; supply chain and primary resource evaluation.

The quality of our work relies on a high calibre team, all of whom bring deep knowledge and interest in sustainable energy, backed up by a strong intellect, clear communication, and good problem-solving skills.

E4tech has grown steadily since its foundation in 1997. We operate from offices in London, UK and Lausanne, Switzerland.

Further information about E4tech is available at www.e4tech.com

The role

Continued growth in our core areas of Bioenergy & Biochemicals; Fuel Cells & Hydrogen; Low Carbon Transport; Energy Systems; Energy Innovation & Policy, and Sustainability & Resources means that we plan to expand our London team. In particular, we are looking for sustainability and life cycle assessment (LCA) skills and experience, to support work across our core areas and grow our broader sustainability-related activities.

As a consultant you will participate in a wide variety of project work and will also contribute to the development of our dynamic firm. You will join as a sustainability and LCA expert with an opportunity to expand your knowledge and apply your skills across the firm's activities. This could mean assessing the life cycle impacts of novel fuels, advising on promising new bio-based chemicals or designing approaches to address sustainability issues. You will be part of a high calibre team working from our London office, but there will be frequent interaction with our Swiss office team and with clients at a range of locations in the UK and abroad.

We offer a collegiate working culture, a competitive salary, and a diverse and interesting environment at the cutting edge of sustainable energy and sustainability. Salary and grade will be based upon experience.

About you

Suitable candidates will have relevant expertise and experience in sustainability and LCA, with a good understanding of energy matters. A very good degree (probably at postgraduate level) is required in a relevant subject. You'll need to be analytically strong to support our various modelling-based projects. Application of sustainability and LCA skills to bioenergy / fuels / chemicals, electricity systems, vehicle technology or fuel cells & hydrogen would be particularly valuable. You must have the ability to communicate clearly and concisely, and enjoy problem solving. You must also have enthusiasm, initiative, and a strong interest in energy-environment and sustainability issues. Fluent English is essential and other languages would be a strong advantage.

E4tech is an equal opportunity employer and strongly values diversity within our team. It is not only our policy but successful practice to ensure that no job applicant or employee receives less favourable treatment because of gender, age, disability, marriage status, pregnancy or maternity, sexual orientation, race, religion or belief.

How to apply

Competition for jobs at E4tech is high, so you will need to demonstrate how you meet the position's requirements and show why you are right for our team. To apply, please email your CV and a cover letter, explaining why you would like to join E4tech and what you would bring to this role, to jobsUK@e4tech.com. Please quote reference **19UK02**.

The deadline for applications is **Tuesday 23 April, 09:00 GMT**.

We will only consider applications from candidates who demonstrate they have the right to work in the UK (e.g. UK citizens; candidates from the European Economic Area or Switzerland; holders of a valid UK work visa). **Please make this clear in your application.**

Please note that E4tech will not consider candidates from recruitment agencies.

Shortlisted candidates will initially be invited for a brief phone interview that will take place on **Friday 26 April**.
