

Sustainability Consultants required

London-based
2-5 years relevant work experience

About us

E4tech is a strategic consultancy focused on sustainable energy, chemicals and materials. We work with companies, governments and investors wanting to understand the global opportunities and challenges of clean energy, chemicals and materials. We have a strong track record in providing strategic business and policy advice backed up by sound technical and sustainability knowledge. Our core areas include Bioenergy & Biochemicals; Fuel Cells & Hydrogen; Low Carbon Transport; Energy Systems; Energy Innovation & Policy, and Sustainability & Resources.

E4tech's clients call on us for strategy development and business planning, market and competitor analysis, due diligence support, and policy analysis and development. We also conduct detailed modelling and assessment work: techno-economic analyses of energy systems; life cycle, greenhouse gas and sustainability assessments; supply chain and primary resource evaluation.

The quality of our work relies on a high calibre team, all of whom bring deep knowledge and interest in sustainable energy, backed up by a strong intellect, clear communication, and good problem-solving skills.

E4tech has grown steadily since its foundation in 1997. We operate from offices in London, UK and Lausanne, Switzerland.

Further information about E4tech is available at www.e4tech.com

The role

Sustainability is a critical aspect across all our core areas of work and we observe a growing interest from our clients in understanding environmental impacts, in particular greenhouse gases, natural resource extraction, land-use change and water management. Consequently, our Sustainability & Resources (SR) Sector is looking for a consultant with sustainability and life cycle assessment (LCA) skills and experience to join our team, support sustainability-related activities across our core areas and help to grow our service portfolio into new strategic areas of energy/transport systems.

Under the supervision of the Director and the SR Sector Leader, your tasks and activities will primarily include:

- Identifying business leads and prospects;
- Leading or participating in proposal writing, sometimes in larger consortia;
- Managing or participating in projects with a strong sustainability dimension, for example LCA applied to conventional or advanced fuels, vehicle supply chains (incl. BEVs and FCEVs) or bio-based chemicals;
- Communicating with clients on project and business development matters;
- Contributing to the development and implementation of E4tech's company-wide and Sustainability & Resources Sector's strategies, including designing novel approaches to address sustainability issues;
- Contributing to internal and external communication activities, including participation in conferences.

We offer a collegiate working culture, learning and training opportunities, a competitive salary, and a diverse and interesting environment at the cutting edge of sustainable energy and sustainability. Salary and grade will be based upon experience. You will be part of a high calibre team working from our London office, but there will be frequent interaction with our Swiss office team and with clients at a range of locations in the UK and abroad.

About you

We are looking for a sustainability consultant with a strong commitment to client satisfaction who enjoys problem solving in a complex environment. You must also have enthusiasm, initiative, and a strong interest in energy, mobility and sustainability. Other skills are listed below.

Required:

- A Post-graduate Degree in sciences, engineering or economics, with a strong environmental and/or energy dimension;
- 2 to 5 years professional experience in sustainability assessments and LCA;
- Strong analytical and modelling skills;
- Ability to communicate clearly and concisely;
- Fluency in English.

Desirable:

- Work experience in the domain of bioenergy, low-carbon fuels, chemicals, power generation, vehicle technology, hydrogen or fuel cells;
- Good command of LCA software, esp. Simapro;
- Knowledge of sustainability assessment methods e.g. water footprinting;
- Knowledge of sustainability standards and certification;
- Spoken/written German, Spanish, French, Chinese or Japanese would be an advantage.

E4tech is an equal opportunity employer and strongly values diversity within our team. It is not only our policy but successful practice to ensure that no job applicant or employee receives less favourable treatment because of gender, age, disability, marriage status, pregnancy or maternity, sexual orientation, race, religion or belief.

How to apply

Competition for jobs at E4tech is high, so you will need to demonstrate how you meet the position's requirements and show why you are right for our team. To apply, please email your CV and a cover letter, explaining why you would like to join E4tech and what you would bring to this role, to jobsUK@e4tech.com. Please quote reference **19UK03**.

The deadline for applications is **Monday 10 June, 09:00 GMT**.

We will only consider applications from candidates who demonstrate they have the right to work in the UK (e.g. UK citizens; candidates from the European Economic Area or Switzerland; holders of a valid UK work visa). **Please make this clear in your application.**

Please note that E4tech will not consider candidates from recruitment agencies.

Shortlisted candidates will initially be invited for a brief phone interview that will take place on **Thursday 13 June or Friday 14 June** in the afternoon.
